

If Your Systems are
Stuck in the Past,
So Is Your Growth — **Meet AI Legacy Application Migrator Service**

Legacy systems don't just age, they compound risk, cost, and technical debt.

The Legacy Problem

Your legacy systems were designed for a different era – and they’ve served you well. But today, they’re showing their age. They’re hard to update, expensive to maintain, and slow to adapt to what your business now demands.

You’re facing:

Rising costs just to keep things running

Delays in launching new digital services

Talent shortages for outdated technologies

Risk exposure from outdated security & compliance practices

This isn’t about replacing what works, it’s about helping you bring it forward.

We help you move beyond systems or vendors that no longer support your growth. Our approach gives you control, flexibility, and the freedom to evolve on your own terms.

Let the Numbers Talk

- Running a single legacy system can **cost business \$30m**, on average. *(Ground Labs, 2025)*
- Organizations currently allocate **60-80** percent of their IT budget to maintaining existing on-site hardware and legacy apps, **which leaves only 20-40 percent of the budget for everything else.** *(DCD, 2023)*

Why Modernize Now

Every day spent relying on legacy systems is another day your competitors advance. Modernizing now positions your business not only to keep pace but to lead—with faster innovation, reduced costs, and increased agility powered by intelligent automation.

Our **AI Legacy Application Migrator Service** will:

-  **Let your current systems co-exist with next-gen platforms.**
-  **Automate compliance and improve performance under the hood.**
-  **Translate decades of code into scalable, cloud-native apps.**
-  **Expose core functions as modern APIs without rewriting everything.**

This isn't a "rip-and-replace" project. It's a modern, intelligent transformation— fast, secure, and engineered for minimal disruption. We help you bridge the old and the new.

SO YOU CAN LEAD WITH CONFIDENCE, NOT CAUTION.

Let the Numbers Talk

Companies that modernize legacy systems report **up to a 30–50% reduction in operational costs** over five years.

([IBM, 2025](#)).

Our Service Approach

Our team of experts will actively guide you through these steps as part of implementing the AI Migrator Service.

1. Discover & assess

Run a rapid system scan, workshops, and roadmap creation to map your goals.

3. Migrate at scale

Execute parallel waves and phased cutovers so your business stays live while the full BSS / OSS stack moves.

2. Prove value with a pilot

Migrate one high-impact module first, fine-tuning the approach before scaling.

4. Operate & optimize

Provide ongoing managed services and continuous improvements to maximize ROI.

Modernization doesn't need to be overwhelming.

It just needs the right starting **point** with the right partner.

Why Choose LeadingPoint?

You're not looking for just another vendor—you need a partner who understands the complexity of legacy systems, grasps the urgency of modernization, and has designed a cost-effective solution to guide you through it.

Here's why clients choose us:

-  **We understand complex systems:** Our team has worked with major organizations across telecom, government, logistic and finance. We've seen the challenges, and we know how to simplify them.
-  **We adopted emerging technologies early:** among the first to apply AI in real-world projects, turning new ideas into practical value.
-  **We are delivering a complete stack migration:** leading an end-to-end modernization for a telecom operator with zero service disruption.
-  **We speak both tech and business:** We bring deep domain expertise, working closely with your IT team while staying aligned with your business goals, from speed and compliance to cost savings.
-  **We move quickly and safely:** You don't need to stop your operations. We modernize in steps while your systems keep running.

Let's do it smarter, and faster, together.

Still in Doubt?

Let Us Show You

Whether you're just exploring or ready to act, **LeadingPoint** makes it easy to take that first step with clarity and confidence.
