Still using a
Traditional development
process? It's slowing you down.

Modern delivery needs intelligence, speed, and resilience. LeadingPoint's **AI-powered SDLC Service** builds smarter, ships faster, and keeps you ahead.

SDLC

Leadingpoint

The Traditional Development Challenge

Your teams are under pressure to move fast, deliver securely, and keep quality high to meet business objectives.
Yet traditional development practices are holding them back.

You're likely facing:

- Slow time-to-market
- Rework consuming up to 40% of your project budget
- Testing and deployment consume a lot of time
- Manual pipelines slow launches and threaten uptime
- Developer burnout and talent gaps
- Security gaps and compliance headaches

These challenges aren't going away — but with the right approach, they don't have to hold you back.

Let the Numbers Talk

- **90%** of enterprises plan to adopt AI in their SDLC by 2026.
  (Zinnov, 2024)

- Developers spend 33 % of their time on technical-debt rework rather than new value. *(CISQ, 2022)*

Why an AI-Powered SDLC Is Essential

Legacy development practices can't keep up with today's demands—faster releases, stricter compliance, and tighter budgets. An AI-powered SDLC framework gives your teams the competitive edge to build better software—faster and with higher quality.

Teams using our framework:

- 40% faster completion of requirements analysis and definition.

- 50% less time spent on design activities.

- 70% faster integration and release.

- 60% less manual testing efforts.

- 40% faster development cycles.

Our AI-powered framework integrates the entire SDLC — from planning to release — empowering your team to focus on innovation, not repetition.

Let the Numbers Talk

Teams using an AI-powered SDLC finish coding tasks up to twice as fast.
(McKinsey Digital, 2023)

Our Service Approach

Simple to adopt. Fast to scale. Designed for minimal disruption.

Our AI-Powered SDLC service Framework blends intelligent automation with human expertise across five practical stages:
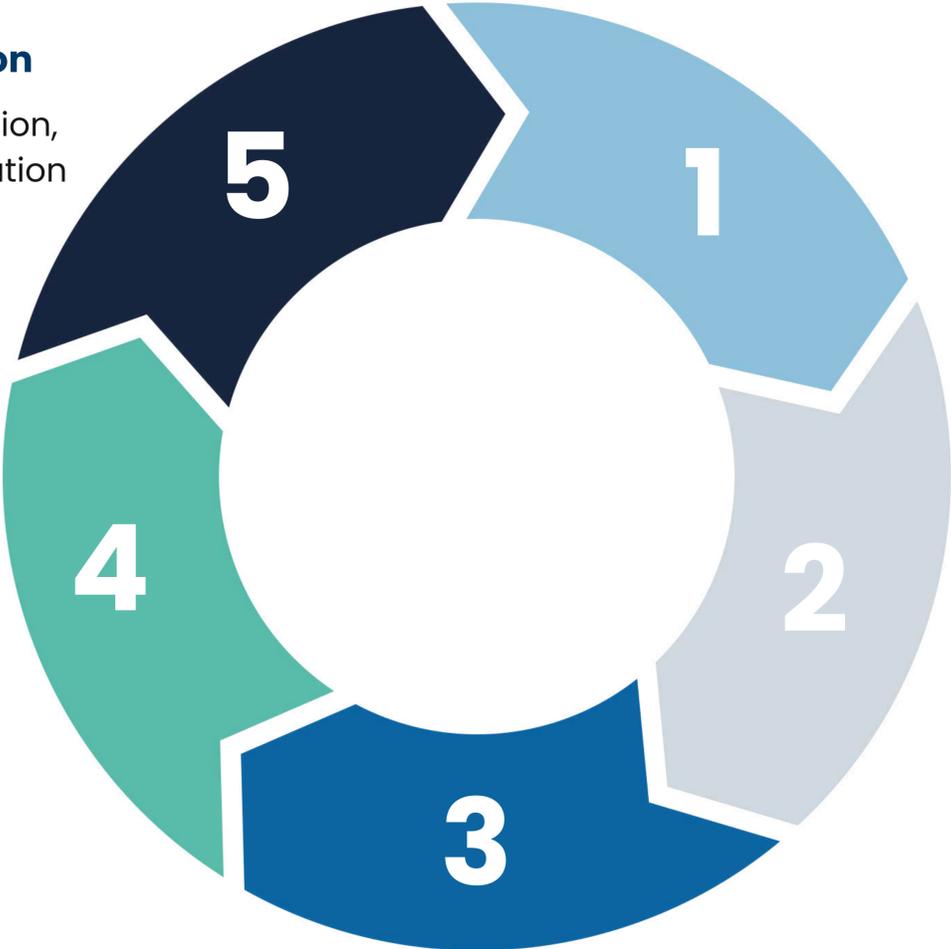

AI-Powered SDLC Framework

5.Verification & Validation

Performs intelligent validation, test case generation, execution and reporting.

1.Requirement Analysis

Extracts, structures, and refines business needs using a multi-LLM requirement agent.

4.Integrate & Release

Seamlessly orchestrate CI/CD pipelines, containerization, and secure deployments.

2.Plan & Design

Generate AI-driven architecture and user flows with built-in best practices.

3.Build & Validate

Generate high-quality code and automated unit tests using a context-aware AI agent.

Why Choose LeadingPoint?

Your Trusted Partner in Smarter Development

You're not just looking for a tool — you need a partner who understands the complexity of modern software delivery and how to simplify it.

Here's why clients choose us:

Deep industry expertise — 19 years of experience across finance, telecom, healthcare, and government.

A complete framework — one integrated solution that covers everything from start to end.

Safe, phased adoption — transform at your pace without disrupting current operations.

Visible ROI — faster releases, lower costs, higher software quality and built-in compliance.

Early AI adopters — Among the first to turn emerging technology into real business value.

Full Transformation — AI-powered SDLC proven in-house and empowering client transformations.

Let's build your future — smarter, safer, and more confidently than ever.
